Technical, Support and Service Questions

Which versions of Blackboard Learn will work with Blackboard Mobile Learn?

Blackboard Learn Releases 8, 9 and 9.1 are supported. The Blackboard Mobile Web Services Building Block has been bundled into the installer for Blackboard Release 9.1 SP1. It will also be bundled in Release 9.0 SP4 and Release 8.0 SP7 later this year. We are also currently investigating the feasibility and timing for supporting earlier versions of Blackboard including CE/Vista and ANGEL.
